THE WEEK AHEAD

Many cattle markets had their first sales of 2024. After some good falls of rain across the eastern states markets reacted positively with values pushing higher. All classes of cattle lifted with light restocking cattle gaining the most ground. Many processors have not resumed full production yet, however that will change over the next few weeks. Australian beef processors lifted throughput by 24% above 2022 levels, and 14% above the 5-year average for 2023 calendar year with 5,752,687 head processed.
